

E-Learning Creation

E-Learning Creation - practical and comprehensible

Directed towards **your specific needs**, I design the **perfect methodical and didactic** e-learning training for your various target groups. I create structures and scenarios, outline activities in a comprehensible way and develop **descriptive instructions**.

I also handle all post-processing work and **refine any available records**. In doing so, I ensure the successful transfer of knowledge through later assessments. I use the **usual customary tools**, such as TT Knowledge Force, SAP Enable Now or Camtasia.

- E-learning course creation
- Creation of structures and scenarios
- Outlining activities, preparing instructions
- Post-processing
- Use of various common tools (TT Knowledge Force, SAP Enable Now/Workforce Performance Builder, Camtasia)

I will be happy to answer any of your questions and provide you with an individual quote.

Best regards,

Tobias Then
